WEATHER

WEATHER SYNOPSIS BY REGION:

NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

Eureka Weather:

High pressure will rebuild over the area today through Thursday morning bringing warm and sunny conditions. On Thursday the ridge will start to break down and this will bring an increase in coastal clouds and cooler temperatures to the coastal areas.

San Francisco Weather:

A warming trend will begin today and persist through midweek as high pressure rebuilds along the west coast. Late in the week a return of onshore flow will result in increased coastal clouds during the overnight and early morning hours.

CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY Sacramento Weather:

Breezy north winds today, decreasing Wednesday. Temperatures warming back to around normal by mid-week.

Hanford Weather:

An onshore wind flow will keep local temperatures near or slightly below seasonal through Wednesday. There will be a slight warming for the latter part of the week through next weekend.

WEATHER SYNOPSIS BY REGION: (Cont.)

SOUTHERN CALIFORNIA:

Los Angeles Weather:

Save for a few morning low clouds it will be sunny today with below normal temperatures. Near normal temperatures are expected by mid-week as high pressure moves in from the west. Seasonable weather will likely continue into the weekend.

Extreme Southwestern California Including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:

A low pressure system moving inland into the northern Rockies will maintain stronger onshore flow through tonight with strong and gusty west winds for the mountains and deserts. High pressure to the south will expand slowly northward bring a slow warming trend and shallower marine layer for Wednesday through Saturday followed by minor cooling for Sunday into early next week.

Southeast California Weather:

Significant clouds or weather expected through Wednesday. Gusty west to southwest winds can be expected once again today with the strongest gusts up to 40 knots in Mohave and northwest San Bernardino counties this afternoon. Winds will shift to northerly over the southern great basin this evening and across the Mojave Desert tonight into early Wednesday morning with much lighter speeds expected on Wednesday.

Cal EOC Incident - 2014 Drought

Situational Summary

On January 17, 2014 Governor Edmund G. Brown proclaimed a State of Emergency and directed state officials to take all necessary actions to prepare for drought conditions. The State Operation Center (SOC) is activated to implement objectives in support of the Governor's priorities. The lack of winter rain and snowfall has resulted in extremely dry conditions in many parts of the State. Reservoir levels are down significantly from where they should be on average for this time of year. If conditions continue without substantial rainfall, severe impacts to municipal water supplies, agriculture (plants and livestock) and firefighting capabilities are likely in store for the State over the next few months. Negative economic impacts will also result.

On April 25, 2014 Governor Brown released an Executive Order on Friday enabling several urgent actions to be taken as the drought persists into the state's traditional dry season.

** As this rainy season comes to an end, it is highly unlikely that precipitation totals will increase significantly over the coming months. This winter's below average rain and snowfall worsens conditions in this third straight dry year.**

Situational Summary (Cont.)

- The Taskforce continues to meet regularly to take actions that conserve water and coordinate state response to the drought.
- The final manual snowpack survey of the season was conducted on Thursday (May 1) and showed California snowpack at 18% of normal.
- DWR has announced that water essential for health and safety will be delivered through the state water project. The current State Water Project Allocation is 5%.
- Cal OES continues to gather drought-related costs from state agencies and local governments.
